The French Solid Waste Partnership

February 2025

Mission & Vision

Partenariat
français pour
les déchets

French
solid waste
partnership

Mission

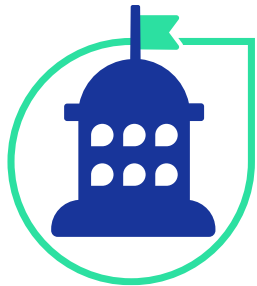

Coordinating and amplifying the voice of French waste professionals

... to advocate in Europe and internationally for: the collection, treatment and recovery of the resources present in waste,

... promoting a sober and more circular economy to help achieve the objectives of the Agenda 2030.

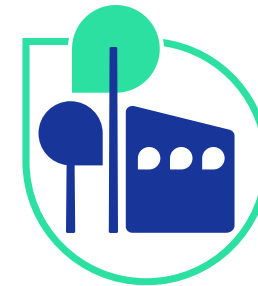

A multi-player platform

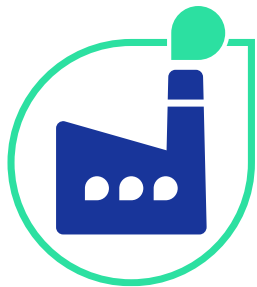

The State, its
Public
Establishments
and Members
of Parliament

partnership

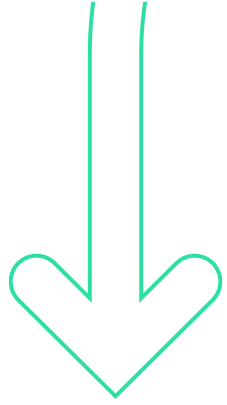

The platform's objectives

- ❑ Provide a forum for forward-thinking and consensus-building
- ❑ Moving waste priorities up the political agenda
- ❑ Sharing France's experience in waste governance, financing and management
- ❑ Meeting France's commitments
- ❑ Learning from others

partnership

The Vision: accompany 2 parallel transitions

Managing all waste...

Economically viable,
environmentally and socially
responsible management for the
benefit of all countries.

Reducing waste volumes...

to achieve "zero waste" - reducing
waste volumes and transforming any
remaining waste into resources.

Partenariat
français pour
les déchets

The impact of our actions

- Our advocacy contributes to
 - developing international frameworks*.
 - opening up opportunities for social and technological innovation
- Our sharing of French know-how** makes them known and recognized worldwide.

* treaties, conventions, agreements, best practice guides, etc.

** institutional, technological, governance, contractual modes, etc.

Mission

Coordinating and amplifying the voice of French waste professionals

...to advocate in Europe and internationally for: the collection, treatment and recovery of resources present in waste, promoting a sober and more circular economy to facilitate the achievement of the Agenda 2030 objectives.

Vision

Supporting two parallel global transitions

- Economically viable, environmentally and socially responsible management of all waste for the benefit of all countries
- Reducing the volume of waste to achieve "zero waste" - reducing the volume of waste and recovering all that remains.

Impacts

Measuring the impact of our two types of action

- Our advocacy contributes to the evolution of* international frameworks and opens up opportunities for social and technological innovation.

* treaties, conventions, agreements, best practice guides, etc.

- Our sharing of French know-how** makes them known and recognized worldwide.

** institutional, technological, governance, contractual modes, etc.

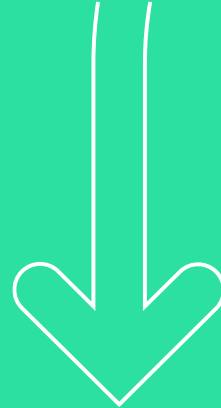

Facilitating the achievement of 2030 Agenda
