RESOURCES

FRANCE - Limay

Recycled PET production

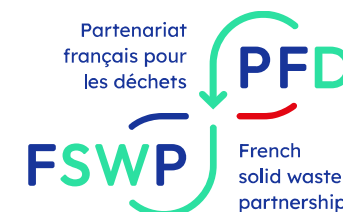

France Plastique Recyclage

Production of recycled plastic (rPET) as a substitute for primary PET

- 45,000 t/year of PET bottles from selective collection processed
- 41,000 t/year rPET produced

➔ [France Plastiques Recyclage : dernière ligne droite pour les travaux d'extrusion - Paprec](#)

CLIMATE BENEFIT:

- > rPET generates 70% less CO₂ than primary PET
- > 50,000 t CO₂ eq avoided by 2022 by using rPET in place of primary PET

CO-BENEFIT:

- > Increases the sustainability of the bottled water industry.
